Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Response to Amendment

1. Applicant's amendment and arguments of July 5, 2006 are acknowledged and entered.
2. The allowance of claim 32 is withdrawn upon reconsideration.
3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reef et al. in view of Fournier et al.

Reef et al. discloses a fuel pump module comprising a reservoir 16, a high pressure fuel pump 14, and a jet pump 10 as recited supplying fuel to the reservoir, the jet pump having a nozzle having an outlet and an inlet in fluid communication with the outlet of the high pressure fuel pump 14. Reef et al. do not disclose at least one restrictor plate as recited. Fournier et al. teach a fuel pump module comprising a reservoir 26, a nozzle 28 supplying fuel to the reservoir, a high pressure fuel pump 14 having an inlet communicating with the reservoir and having an outlet of pressurized fuel, and a restrictor plate 30 between the outlet of the fuel pump and the inlet of the nozzle 28. It would have been obvious to one having ordinary skill in the art at the time the invention

Art Unit: 3752

was made to have modified the device of Reef et al. by incorporating a restrictor plate between the outlet of the fuel pump and the inlet of the nozzle of the jet pump as taught by the concept of Fournier et al. to control fuel flow. Reef et al. also discloses the reservoir 16 having an inlet and the outlet of the nozzle being generally adjacent the inlet of the reservoir as recited in claim 2.

Claim Rejections - 35 USC § 102

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 32 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Fournier et al.

Fournier et al. shows a fuel transfer arrangement as recited comprising a source of pressurized fuel (pump 14), a nozzle 28 disposed in one portion of the fuel tank 26 having an inlet at 96 in communication with the source of pressurized fuel to receive pressurized fuel and an outlet through which fuel is discharged, and a restrictor plate 30 having an orifice 90 communicating with the source of pressurized fuel disposed between the source 14 and the nozzle and axially spaced upstream of from the inlet of the nozzle.

Allowable Subject Matter

8. Claims 33 and 35-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 3-11, 13-21, 23, and 25-31 are allowed.

Art Unit: 3752
